JOURNAL OF WIND ENGINEERING AND INDUSTRIAL AERODYNAMICS

(formerly Journal of Industrial Aerodynamics)

VOL. 27 JANUARY 1988

Contents

(Abstracted/Indexed in: Appl. Mech. Rev., Curr. Contents/Eng. Technol. Appl. Sci., Eng. Index, Geo Abstr., Phys. Abstr., Sci. Citation Index)

Preface v

Fatigue testing of a full scale steel rotor blade of the WPS-30 Wind turbine
D.R.V. van Delft, J.L. van Leeuwen, C. Noordhoek and P. Stolle (Delft, The Netherlands) 1

Ten features which make the Holec wind turbine WPS 30 - 3 unique in the world
J.G.Th. Flint (Hengelo, The Netherlands) 15

Some numerical experiments with a linearized model of a synchronous machine with rectifier
M.J. Hoeijmakers (Eindhoven, The Netherlands) 27

North Wind 100: setting new standards for wind generators
P. van Lieshout, C. Coleman and L. den Hollander (Moretown, VT, U.S.A.) 39

Large-scale electricity generating with the circular track wind turbine
J. Portegijs (Wageningen, The Netherlands) 53

Three-dimensional free wake calculation of wind turbine wakes
A. Zervos (Athens, Greece), S. Huberson (Orsay, France) and A. Hemon (Paris, France) 65

Experimental validation of the UPM computer code to calculate wind turbine wakes and comparison with other models
A. Crespo, J. Hernandez, E. Fraga and C. Andreu (Madrid, Spain) 77

Development of a gust model for the design of large wind turbines
F.J. Verheij (Apeldoorn, The Netherlands) 89

Giswa: geographical information system wind resource
B.J.C.M. Rutten, B. v.d. Haspel and A. v. Beek (Delft, The Netherlands) 103

The dynamic response of wind turbines operating in a wake flow
U. Hassan, A.D. Garrad (London, Gt. Britain) and G.J. Taylor (Surrey, Gt. Britain) 113

A numerical model for calculating the power output fluctuations from wind farms
H. van Oort (Apeldoorn, The Netherlands) 127

The wind farm of Zeebrugge: Experimental set-up
J. v. Leuven and D. Stevens (Antwerp, Belgium) 139

Planning a 6 x 100 kW windfarm on the Island of Limnos
D. Kanellopoulos, A. Androutsos and A. Kritikos (Athens, Greece) 145

Use of flywheel storage for wind diesel systems
T.S. Davies, C.M. Jefferson (Bristol, Gt. Britain) and R.M. Mayer (Middlesex, Gt. Britain) 157

Windfarms in India: minimizing the costs of generation
J. Hossain, K. Thukral and V.V.N. Kishore (New Delhi, India) 167

Wind energy potential in Iraq
A.S.K. Darwish and A.A.M. Sayigh (Reading, Gt. Britain) 179

Siting procedure for large wind energy projects
J.C. Berkhuizen, E.T. de Vries and A.F.L. Slob (Rotterdam, The Netherlands) 191

The windfarm in the outer harbour of Zeebrugge - 9 months of experience
M. de Wilde, L. Lauriks, P. Vanderborght, M. Gabriels, W. van Melckebeke, S. van Steenkiste, J. van Leuven, D. Cosaert, D. Stevens, R. van den Poel, J. de Ceulaerde, R. Verbrugghe.(Brussels, Belgium)..... 199
Calculating the flowfield in the wake of wind turbines
J.F. Ainslie (London, Gt. Britain)..... 213
Development and validation of wind farm models
L. van der Snoek (Apeldoorn, The Netherlands)..... 225
Optimal control of wind power plants
M. Steinbuch, W.W. de Boer, S.A.W.M. Peters (Arnhem, The Netherlands), O.H. Bosgra and J. Ploeg (Delft, The Netherlands)..... 237
Some aspects of optimising the integration of wind farms into the electricity grid
M.P. Vermeer (Delft, The Netherlands)..... 247
Economics of wind power plants
F.J. Föllings and A.E. Pfeiffer (Utrecht, The Netherlands)..... 263
The economics of wind farm siting in Holland
J.C. van den Doel and P.H. van Gemert (Delft, The Netherlands)..... 275
The construction and operation of a 5 MW windfarm
D. Lindley and C. Gamble (Middlesex, Gt. Britain)..... 285
A 30 MW wind farm project for Creta Island
D. Papastefanakis and A. Zervos (Athens, Greece)..... 297
Technical issues in windfarms and supporting activities within the International Energy Agency (IEA)
D.J. Milborrow (London, Gt. Britain)..... 309
The design and construction of 25 MW wind farm
A. Brown and J. Watt (Glasgow, Gt. Britain)..... 319
Status of the U.S. wind power industry
R. Lynette (Washington, DC, U.S.A.)..... 327
Wind power in Denmark! Wind power in Sweden?
I. Carlman (Stockholm, Sweden)..... 337
Windfarming in Denmark
B.T. Madsen (Denmark)..... 347
Offshore windfarm. Wind turbines of 200-300 kW with separate foundations
M. Elgaard, B. Mathiesen (Aarhus, Denmark) and B. Papso (Hojbjerg, Denmark)..... 359
Boost to windenergy in The Netherlands
R. de Bruijne, T. Haanen and R.K. Hack (Sittard, The Netherlands)..... 373
The siting of large-scale wecs in The Netherlands
L. Arkesteijn and G. van Huis (The Hague, The Netherlands)..... 387
Statutory procedures for windmill construction tested in practice
A.L.A.M. Steijaert (Emmeloord, The Netherlands)..... 399
Prospects for windfarm development in Ireland
B. Hurley (Dublin, Ireland)..... 407
Wind energy for electricity generation in Sri Lanka
W.J.L.S. Fernando (Colombo, Sri Lanka)..... 421
Integration of wind farms into the public power system in India
A. Jagadeesh (Nellore, India)..... 433
Research program concerning the social and environmental aspects related to the windfarm project of SEP
F. Lubbers (Arnhem, The Netherlands)..... 439
IJsselmij realises Europe's largest windfarm (7,5 MW) on the dike of the Noordoostpolder
H.F.M. Paes (Zwolle, The Netherlands)..... 455
Author index..... 469
